Objective

Full-stack developer with **1+ years of hands-on experience** building and deploying scalable web and mobile applications using **React, Next.js, Node.js, MongoDB, and AWS**. Experienced in developing production-ready features including **payment integrations, AI-powered services, cloud deployments, chat systems, and RESTful APIs**. Strong focus on clean UI, backend scalability, performance optimization, and solving real-world problems. Passionate about building high-impact digital products and contributing in fast-paced development environments.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Redux, React Native (Expo)

Backend: Node.js, Express.js, REST APIs, JWT Authentication, OAuth, Middleware

Databases: MongoDB, MySQL

Cloud & DevOps: AWS (S3, EC2), Git, GitHub, CI/CD (basic)

AI Tools: OpenAI (ChatGPT), Claude (Anthropic), AI-based Code Review & Optimization Tools

Tools: Git, GitHub, Postman, VS Code, Render, Netlify, Vercel

Education

Raghu engineering college

B. Tech, CSE

Aug 2021 – Mar 2025

Visakhapatnam, Andhra Pradesh

Experience

Company: Propenu Pvt. Ltd – Hyderabad, India

Full Stack Developer | Dec 2025 – Present

Project: Propenu (Real Estate Project)

- Built a scalable real estate platform using **Next.js, Node.js, Express.js, MongoDB, and TypeScript**.
- Integrated **Razorpay** subscription payments for secure plan-based property posting.
- Implemented **AI-powered services and chatbot features** to enhance property search, user engagement, and customer support workflows.
- Solved **20+ backend and deployment issues** related to API performance, authentication, and production builds.
- Orchestrated the **storage and retrieval of 1000+ property images** utilizing **AWS S3** and managed the deployment of server-side logic on **AWS EC2**.
- Improved API validation and security using **JWT** and **Zod**, reducing invalid request handling issues.

Company: Galaxy Tech Solutions – Hyderabad, India

Full Stack Intern | May 2025 - Nov 2025

Projects: Plot network and Qr Home

- Developed **15+ REST APIs** and backend controllers using **Node.js, Express.js, and MongoDB**.
- Implemented CRUD modules for property listings, users, and project management systems.
- Built responsive mobile UI screens for the **QR Home** app using **React Native (Expo)**.
- Collaborated in a team environment using **Git workflows, pull requests, and code reviews**.

Personal Projects

1. Virtual Try-On App (AI-Based Fashion Tech Platform)

Description:

- Designed and proposed a cross-platform AI-powered Virtual Try-On mobile application enabling users to virtually try outfits from platforms like Amazon, Flipkart, Myntra, and Ajio.
- Planned architecture using **React Native, Node.js/Express**, and **AWS (S3, Lambda, EC2)** for scalable cloud deployment.

Certifications

MERN Stack Development – Completed by **ExcelR**, covering MongoDB, Express.js, React.js, and Node.js.

Data Science – Industry-aligned program by **SkillDzire** on data analysis and machine learning.

AWS Fundamentals – Certified by **Amazon** in cloud computing and AWS services.

Soft skills

Analytical Thinking | Data Storytelling | Problem Solving | Communication | Team Collaboration
